1650 Mission St. Suite 400 San Francisco, CA 94103-2479

Reception: 415.558.6378

Fax: 415.558.6409

Planning Information: **415.558.6377**

PROJECT DESCRIPTION

The project consists of new construction of 3-story single-family house.

SITE DESCRIPTION AND PRESENT USE

The site is a vacant 25' wide x 100' lot near the end of Head Street, a one block long dead-end street.

SURROUNDING PROPERTIES AND NEIGHBORHOOD

This block of Head St. consists of vacant lots, a church and 1 to 3-story wood and stucco clad houses, including two three-story buildings immediately adjacent to the proposed project. The mid-block open space is minimal --limited by the 4 adjacent properties' rear yards.

DR REQUESTOR

Marc Christensen, of 60 Kempton Ave. of the Merced Extension Triangle Neighborhood Association, on behalf of adjacent neighbors.

DR REQUESTOR'S CONCERNS AND PROPOSED ALTERNATIVES

- 1. Drainage;
- 2. Increased density above the zoned single-family land use;
- 3. Blockage of existing windows and skylights;
- 4. Sunlight and solar access to solar panels;
- 5. Impacts to emergency access of dead end street;
- 6. Seismic hazard of 3-story house.

Requested changes:

- 1. reduce height to 20'-6" or less;
- 2. reduce the building depth to 46'-11" or less;
- 3. provide a minimum of 5' wide side setback on the North side;
- 4. provide proper water drainage system to prevent overflow to adjacent properties.

See attached Discretionary Review Application, dated October 26, 2018.

PROJECT SPONSOR'S RESPONSE TO DR APPLICATION

The sponsor has complied with the Planning Code and Residential Design Guidelines especially in relation to building height and massing at the rear to address issues related to scale. To address drainage additional permeable landscaping was incorporated into the site design. The project will not have a significant effect on light.

See attached Response to Discretionary Review, dated November 20, 2018.

ENVIRONMENTAL REVIEW

The Department has determined that the proposed project is exempt/excluded from environmental review, pursuant to CEQA Guideline Section 15301 (Class One - Minor Alteration of Existing Facility, (e) Additions to existing structures provided that the addition will not result in an increase of more than 10,000 square feet).

RESIDENTIAL DESIGN TEAM REVIEW

RDAT found that the scale and massing of the proposed new building is compatible with adjacent buildings, and that the following issues raised by the DR requestor are not exceptional or extraordinary. Specifically:

- 1. Drainage is an issue addressed by Department of building inspection.
- 2. Increased density above the zoned single-family land use is speculation. What is proposed complies with the current Zoning and any infraction would become an enforcement issue.
- 3. The proposed blockage or diminishment of light to existing windows and skylights are not exceptional or extraordinary; property line windows are not protected.
- 4. Sunlight and solar access to solar panels is not protected.
- 5. Impacts to emergency access of dead-end street are not Planning Department issues, but deadend streets with greater density exist throughout the City without detriment to public safety and welfare.
- 6. A 3-story house engineered to current codes is not considered a seismic hazard.

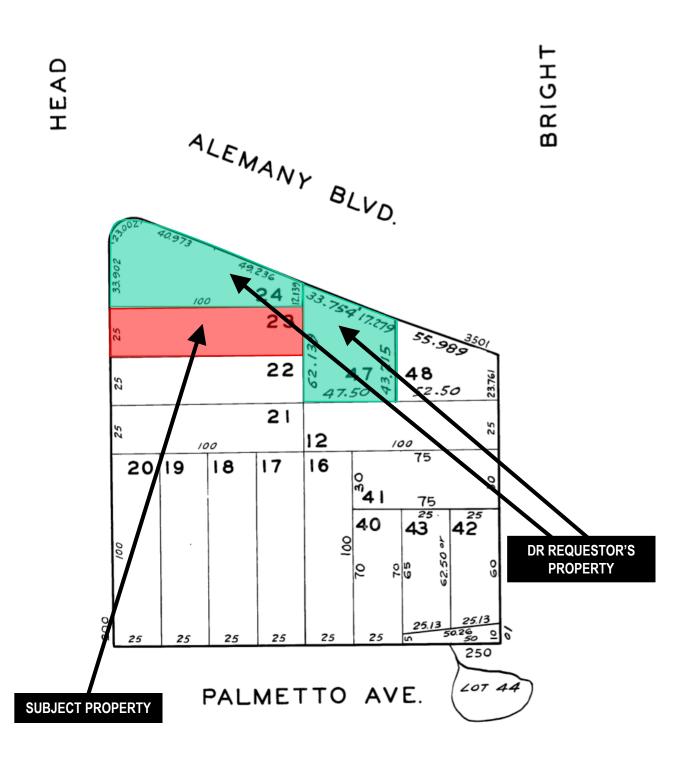

RECOMMENDATION: Do not take DR and approve project

NOTICE OF BUILDING PERMIT APPLICATION (SECTION 311)

On **November 5, 2010**, the Applicant named below filed Building Permit Application No. **2010.11.05.4435** with the City and County of San Francisco.

PROJECT INFORMATION		APPL	APPLICANT INFORMATION	
Project Address:	216 Head Street	Applicant:	Derek Vinh	
Cross Street(s):	Palmetto Avenue	Address:	90 South Spruce Ave, Ste. K	
Block/Lot No.:	7135/023	City, State:	San Francisco, CA 94080	
Zoning District(s):	RH-1 / 40-X	Telephone:	650.741.6968	
Record No.:	2016-005189PRJ	Email:	info@icedesigninc.com	

You are receiving this notice as a property owner or resident within 150 feet of the proposed project. You are not required to take any action. For more information about the proposed project, or to express concerns about the project, please contact the Applicant listed above or the Planner named below as soon as possible. If you believe that there are exceptional or extraordinary circumstances associated with the project, you may request the Planning Commission to use its discretionary powers to review this application at a public hearing. Applications requesting a Discretionary Review hearing must be filed during the 30-day review period, prior to the close of business on the Expiration Date shown below, or the next business day if that date is on a week-end or a legal holiday. If no Requests for Discretionary Review are filed, this project will be approved by the Planning Department after the Expiration Date.

Members of the public are not required to provide personal identifying information when they communicate with the Commission or the Department. All written or oral communications, including submitted personal contact information, may be made available to the public for inspection and copying upon request and may appear on the Department's website or in other public documents.

DISCRETIONARY REVIEW REQUEST

.

In the space below and on seperate paper, if necessary, please present facts sufficient to answer each question.

 What are the reasons for requesting Discretionary Review? The project meets the standards of the Planning Code and the Residential Design Guidelines. What are the exceptional and extraordinary circumstances that justify Discretionary Review of the project? How does the project conflict with the City's General Plan or the Planning Code's Priority Policies or Residential Design Guidelines? Please be specific and site specific sections of the Residential Design Guidelines.

PLEASE REFER TO ATTACHED LETTER (S) TO MS. CATHLEEN CAMPBELL, PLANNER, WHICH EXPLAIN PROBLEMS.

2. The Residential Design Guidelines assume some impacts to be reasonable and expected as part of construction. Please explain how this project would cause unreasonable impacts. If you believe your property, the property of others or the neighborhood would be unreasonably affected, please state who would be affected, and how.

THE PROPOSED HEIGHT AND DEPTH WILL DRASTICALLY AFFECT THE THE SUNLIGHT ON SOLAR PANELS TO AN ADJACENT PROPERTY. PLE LACK OF PROPER DRAINAGE WILL CONTINUE TO FLOOD TWO ADJACENT PROPERTIES (TO THE NORTH, AND TO THE NORTH-EAST CONTINUING TO DAMAGE BOTH PROPERTIES, (SEE ATTACHED LETTERS).

3. What alternatives or changes to the proposed project, beyond the changes (if any) already made would respond to the exceptional and extraordinary circumstances and reduce the adverse effects noted above in question #1?

i) REDUCE BUILDING HEIGHT TO 20'6" OR LESS. 2) REDUCE BUILDING DEPTH INTO BACK YARD TO 46'11" OR LESS 3) PROVIDE MINIMUM OF 5' WIDE EASEMENT ON NORTH SIDE OF PROPERTY (AS WAS THE CASE WITH THE PREVIOUS BUILDING 4) PROVIDE PROPER WATER DRAINAGE SYSTEM ON THE PROPERTY TO PREVENT FLOODING ON TO ADJACENT PROPERTIES. 5) PROVIDE PROPER DEPTH OF BACKYARD LANDSCAPING TO PREVENT OVERFUN

OF SOIL ON TO ADJACENT PROPERTIES.

DISCRETIONARY REVIEW REQUESTOR'S AFFIDAVIT

Under penalty of perjury the following declarations are made: a) The information presented is true and correct to the best of my knowledge. b) Other information or applications may be required.

Re: Project Address: 216 Head Street Record No. 2016-005189PRJ

October 22, 2018

Dear Ms. Campbell:

As president and vice-president of the Merced Extension Triangle Neighborhood Association (METNA), we are requesting a Discretionary Review hearing regarding the property at 216 Head Street (Block 7135, lot No. 023).

We are in receipt of several letters from adjacent neighbors to address concerns of a planned new construction listed as a "single family home, three story, four bedroom," in a RH-1/40X Zoning District.

A building Permit Application No. 2010.11.05.4435 (November 5, 2010) was filed. At the time there was an abandoned single story, one or two bedroom, uninhabitable building at 216 Head Street. The existing building at that time had numerous building complaints filed over a period of 7-21-03 to 11-5-10, and from 11-5-10 until the building was demolished on 5-18-18. In the period 11-5-10 to early 2018 no less than 15 complaints and notice of violations, and/or orders of abatement were filed regarding 216 Head Street.

During that period of time the owners of the property listed as Bill Yu Tsz Choi and Anna Yan Ta basically ignored all violations and were fined numerous times, according to records from the Department of Building Inspection. Also listed as an owner is Alfred Lee.

Alfred Lee built the two adjacent three story single family homes at 208 and 212 Head Street in 2005. We are not certain if Alfred Lee still owns the two adjacent buildings. However what is known is that as soon as the Department of Building Inspection signed off on the buildings for occupancy, the buildings were immediately transformed in to multiple unit dwellings, with four doorbells at each property, and according to tenants living in those buildings over the years, the "single family home" was divided into four units, with four distinct inside front doors, for what we understand is a violation of the zoning laws. There is further concern that this will be done again with the 216 Head Street property.

An April 7, 2017 Pre-Application Meeting did not list this as "new construction", and there was listed: a) a vertical addition of 7 feet or more, and b) a horizontal addition of 10 feet or more.

Plans dated 9/23/2010 are different from plans dated 11/06/2014, with a print date of May 31, 2018. These issues as to what is actually going to be built on the site need to be addressed.

Additionally, there are issues with the lot in its current state and related drainage issues that have plagued the homes to the north at 218 Head Street and to the east at 3521 Alemany Blvd. that must be addressed prior to the issuance of any building permits. We do not see any mitigation measures in place.

There are mounds of dirt/sand that were moved on to the lot behind the uninhabited home in approximately 2004 when construction began at 208 and 212 Head, according to the next door neighbor. It is unclear how much of that dirt will be removed/excavated prior to the new construction. These mounds of excess dirt that were not on the lot prior to 2004 have most likely contributed to the runoff of water from the 216 Head Street property on to the adjacent neighbors property to the north at 218 Head Street and to the east at 3521 Alemany Blvd.

There used to be an easement on the north side of the property at 216 Head that provided daylight to the building to the north. Plans for the three story new construction eliminate any easement and in fact place the building right on the property line to the north. This new alignment blocks any daylight into a window on the south side of the 218 Head Street property. The window will now face directly into the side of the newly constructed building.

The previous building was one story tall at 216 Head. The new building will be three stories tall, thus casting shadows not only on the building at 218 Head Street from late morning to late afternoon, but also casting shadows on to the property to the east at 3521 Alemany Blvd., which has solar panels on the roof, relying on daytime sunlight. This will severely impact the solar panels.

A window is shown on the newest plans on the north side, which will look directly down into the existing skylight at the property at 218 Head, giving less privacy to the occupants of the existing building.

These all are issues that need to be addressed through the discretionary review process. We look forward to a favorable response from the Planning Department.

Sincerely,

Marel

Marc Christensen, president

Glen Hatakeyama, vice-president Merced Extension Triangle Neighborhood Association

Cathleen Campbell Planner San Francisco Planning Department 1650 Mission Street, Suite 400 San Francisco, CA 94103

Re: Building Permit Application No. 2010.11.05.4435, 216 Head Street, Block 7185 / Lot 023

Dear Ms. Campbell,

My name is Paul Chow and as the property owner adjacent to the proposed project, I am requesting a Discretionary Review as part of our neighborhood community association, METNA (Merced Extension Triangle Neighborhood Association), for the following reasons:

- Poor water drainage from 216 Head Street has cause extensive water damage to my property for the past several years during the rainy season. I have video evidence showing water gushing from its backyard and flooding into my garage. The proposed project does not address this continuing problem.
- The listed owner/representative, Alfred Lee, was involved with renovating the two adjacent properties to the south
 of 216 Head Street and have turned both properties zoned for RH-1 into 4-story apartment complexes with
 extensive fire escape systems in the back of the buildings. It is my concern that this will happen again with this
 project, creating another multi-unit rental property.
- It has been observed by the Pastor of The Golden Cate Church Of Christ Holiness U.S.A. at 201 Head Street that there have been more than sixteen additional cars parked in the area since the two 4-story apartment complexes went up. Should this continue with the proposed property, parking will be nearly impossible in the area.
- The proposed combination of three stories and extension of the building into its backyard will dramatically decreased the sunlight to my property and adversely affect my solar panels.

Thank you in advance for allowing my concerns to be heard.

Sincerely,

Paul Chow

cc Marc Christensen, METNA President Steve Heide, METNA Neighborhood Improvement

San Francisco Planning Department 1650 Mission Street, STE 400 San Francisco, CA 94103 Att: Ms. Cathleen Campbell

Dear Ms. Campbell:

First of all, thank you for taking the time to review some of the concerns regarding the project under your jurisdiction.

I am the owner of 218 Head St and the most affected neighbor on this project. I am kindly requesting a "Discretionary Review" due to the facts indicated below.

- 1. I have not received a surveyor document that describes the property lines between the two properties.
 - 2. For the last 30 years of ownership, I had an easement alley between the two properties, 5 feet in distance, which appears to disappear if the plans are accepted as filed.
 - 3. I need a details of the foundation depth as well as the footings and how it will impact my house structure. My engineer will review the new drawings presented.
 - 4. Building three story building next to my house will create a weigh problem against my foundation. In particular due to the slope terrain and sand type of soil.
 - 5. We need an environmental study to determine if the sandy soil on a slope terrain will not create a problem with a three story building next to a single family home property. Is this safe in an earthquake situation?
 - 6. <u>My big biggest concern is that my house basement has been flooded during</u> <u>the last four raining seasons creating a mold problem</u>. This is due to the lack of a proper drain system. Plus the high dirt of about 12 feet left on the 216 Head property since 2004. Rainvwater filtrates into my foundation and runs into my basement.
 - 7. We need a detail plan on the new drain system that it will be used to avoid future flooding problems into my basement and property foundation (on the West side of my property).

- 8. The plans do not have any details on the drain system in the front of the new house. If not properly designed all the rain will run into my property retaining wall. This on the east side of the property on the Alemany side. This retaining wall keeps the entire slope of my property in place.
- 9. We need details on the sidewalk that will be built since it might make it more difficult to exit from my cart port. Right now, I already have problems due to all the cars parked in front of my property.
- 10. Detail drawings that indicate the back yard design that will demonstrate that all the rain and sand that comes on my back yard will no longer be an issue.
- 11. Building this property wall to wall to my property creates a problem. I have a triangle roof that goes out of the siding of my house. The design is not feasible.
- 12. The plans presented completely cover my side window leaving no sunlight or air to enter. I have had this window for the last 30 years of ownership.
- 13. Another window impacted will be the west front side window that will receive less light with a three story building next door. This will window has also been in place for the last 30 years of ownership.
- 14. On the roof, I have had two skylights that bring sun into the house. A three story building will shadow the sun. The skylights have been in place for the last 30 years of ownership.
- 15. The whole terrain needs to be leveled off so that their property is not at a higher altitude because it will create a problem with my foundation.
- 16. The garages are planned next to my two bedrooms, this will create a fire hazard and disturbance next to where my family sleeps.
- 17. The plans do not have details about the front or the back fence that will divide the two properties. Part of my front fence was damaged when the house was demolished. The issue was discussed but nothing was corrected to this date.
- 18. Building a three story building in a residential area is not feasible. We already have a congested street with all the cars parked from the adjacent properties 208 and 212. This is creates a hazard in an emergency situation.
- 19. Note Head street only has one outlet for emergency vehicles moving in and out of the street in emergency situations. Let alone the rest of us moving in and out in the congested pathway. We already had challenges with regular or big size vehicles coming in and out of the area.

- 20. In an earthquake situation my single family house next to a three story building will be catastrophic. This is not feasible.
- 21. We are proposing that the owner submit new plans to build a one story single family home which details all the concerns here indicated as well the concerns of others neighbors.
- 22. I have tried to contact with owner to discuss my concerns with no response or willingness to negotiate this project.

In advance, we appreciate for listening to our concerns and questions about this project.

Best regards,

Sandra Lopez 218 Head St SF, CA 94132

RESPONSE TO DISCRETIONARY REVIEW (DRP)

Planning

SAN FRANCISCO PLANNING DEPARTMENT 1650 MISSION STREET, SUITE 400 SAN FRANCISCO, CA 94103-2479 MAIN: (415) 558-6378 SFPLANNING.ORG

Project Information

Property Address: 216 Head Street (AB 7135/023)

Building Permit Application(s): 2010.11.05.4435

Record Number: 2016-005189DRP

Assigned Planner: David Winslow

Project Sponsor

Name: Jaidin Consulting Group, Project Representative

Phone: (415) 863-3888

Zip Code: 94132-3219

Email: jdngrp@pacbell.net

Required Questions

1. Given the concerns of the DR requester and other concerned parties, why do you feel your proposed project should be approved? (If you are not aware of the issues of concern to the DR requester, please meet the DR requester in addition to reviewing the attached DR application.)

See DR Response - supplemental attached

2. What alternatives or changes to the proposed project are you willing to make in order to address the concerns of the DR requester and other concerned parties? If you have already changed the project to meet neighborhood concerns, please explain those changes and indicate whether they were made before or after filing your application with the City.

See DR Response - supplemental attached

3. If you are not willing to change the proposed project or pursue other alternatives, please state why you feel that your project would not have any adverse effect on the surrounding properties. Include an explaination of your needs for space or other personal requirements that prevent you from making the changes requested by the DR requester.

See DR Response - supplemental attached

PAGE 1 | RESPONSE TO DISCRETIONARY REVIEW - CURRENT PLANNING

V. 5/27/2015 SAN FRANCISCO PLANNING DEPARTMENT

Project Features

Please provide the following information about the project for both the existing and proposed features. Please attach an additional sheet with project features that are not included in this table.

	EXISTING	PROPOSED
Dwelling Units (only one kitchen per unit - additional kitchens count as additional units)	vacant	1
Occupied Stories (all levels with habitable rooms)		2
Basement Levels (may include garage or windowless storage rooms)		1
Parking Spaces (Off-Street)		2
Bedrooms		4
Height		31 '
Building Depth		63' 2"
Rental Value (monthly)		n/a
Property Value		

I attest that the above information is true to the best of my knowledge.

Printed Name:	Patrice Eamhdail far Iaidia Cansulhing Craum 11 C. Dealart Deservation	generating .	perty Owner horized Agent

If you have any additional information that is not covered by this application, please feel free to attach additional sheets to this form.

DR Response – Attachment

1. Given the concerns of the DR requester and other concerned parties, why do you feel your proposed project should be approved?

The proposed project is construction of a new residential building envelope following demolition of an unsound structure, reviewed under Section 311, Residential Design Guidelines; and approved by the Department of City Planning Staff.

The property owner concluded after thorough investigation that the original dilapidated structure could not be retained, given significant safety hazards; and therefore, proceeded with applications required to demolish the building. Structural reports substantiating the unsound condition of the building were submitted and reviewed by the City.

In 2016 and 2017 the Planning Department completed Environmental Review, issuing a CEQA Categorical Exemption determination; approving the demolition and concluding that the proposed new three-story structure would not result in any significant impacts.

In May 2018 the original building was demolished and we expect that this demolition has resolved many of the items cited in the DR application; specifically concerning complaints, which pertained to the prior structure. The site is now vacant and the owner is committed to maintaining the property's safety while review of the project is finalized.

In conjunction with the demolition process the project sponsor worked with Planning Staff to develop a new family sized residential project in full compliance with underlying zoning and design guidelines. The current building design was found to be in full compliance with Planning Code requirements for front setback, rear yard, and open space. In addition, the project meets a Citywide goal, for a new family sized residential building envelope.

This proposed project will be constructed and engineered in full compliance with the City's Building and Safety Code requirements and the project sponsor will work with the City to assure proper engineering and drainage is established for the site.

2. What alternatives or changes to the proposed project are you willing to make in order to address the concerns of the DR requester and other concerned parties? If you have already changed the project to meet neighborhood concerns, please explain those changes and indicate whether they were made before or after filing your application with the City.

The project sponsor worked directly with Planning Staff during the proposed demolition and 311-review process to develop a final design and layout for a replacement project which is fully code complying and satisfies the City's residential guidelines.

Demolition of the original structure required historic resource evaluation and structural soundness reports; both of which supported demolition of the unsound structure. This demolition removed the series of DBI complaints regarding the property improvements.

Supporting a design compatible with the surrounding neighborhood, the building was developed with a third story front set back; maintaining two-story appearance along the street frontage. An interior lightwell was added as well as a third level graduated notched rear set back along the 218 Head Street property line.

Promoting site drainage, the proposed project was modified to include a 14-foot setback; including landscaping and driveway with permeable surface which adds interesting detail to streetscape and also promotes stormwater runoff from the street and sidewalk. A permeable material is one that allows stormwater to infiltrate the underlying soils.

In response to neighborhood concerns regarding the now vacant site, the project sponsor will make every effort to maintain the property during this current review period and will consider mitigation measures to assure the property remains environmentally safe.

In addition, as offered by Planning Staff, David Winslow; project sponsor representatives will be available to meet with the neighborhood residents to discuss the proposed project design and issues raised by the DR applicant, which in the meanwhile are discussed in the section below for your review and consideration.

3. If you are not willing to change the proposed project or pursue other alternatives, please state why your project would not have any adverse effect on the surrounding properties. Include an explanation of your needs for space or other personal requirements that prevent you from making changes requested by requestor.

The proposed residential project is intended to support San Francisco's extended family population and afford privacy for the generational occupants. In addition, it offers the potential for adding an accessory dwelling unit for a parent or grandparent.

We have reviewed the alternative recommended by the DR applicants, which is an in-kind replacement of the prior small single-story building envelope; and suggest that this is a significant underutilization of the property based on the economics of site development and also failure to meet goals for much needed family sized housing.

Regarding specific issues of sunlight, shadows and privacy, our findings concur with environmental review findings: that ultimately the proposed project should not have a significant impact on the surrounding properties based on the physical location of the subject interior block parcel and neighboring property development.

Project sponsor representatives will be available to discuss these issues at the Planning Staff initiated meeting and in the meanwhile offer the following thoughts for review and consideration.

The primary DR applicant at <u>218 Head Street</u> is a corner parcel, benefiting from full exposure along both Alemany and Head Street frontages. Landscaping and exterior modifications along the Alemany property frontage could increase light and air availability; which would far outweigh any consequences of the current project build-out.

With regards to a purported historic easement between this corner lot and the subject interior block parcel; we could find no record and request that the owner, Ms. Lopez, provide the City and project sponsor with a recorded document for review. This project as currently designed is legal and code complying with regards to RH-1 required setbacks.

It is also noted, that the 218 Head Street property owner has to work with the City on its own maintenance items; which once resolved should address certain drainage and site concerns on that parcel.

The DR applicant, located at <u>3521 Alemany</u>, is situated between the 218 Head Street DR applicant and a recently constructed three-story single-family residence at 3501 Alemany; which could potentially cause more shadow potential than the subject proposed development – with these light and shadow impacts documented by Mr. Chow in his DR application filed against the 3501Alemany development.

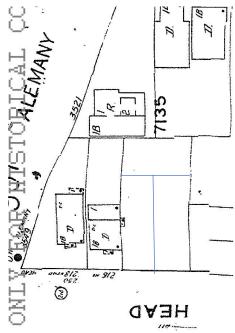

This Alemany 'key lot" parcel shares lot lines with the new building at 3501 Alemany and also abuts rear yards of 218, 216, and 212 Head Streets.

Project representatives will be available to review the DR applicant's shadow analysis information demonstrating light and shadow impacts on the DR applicants' solar panels resulting from of the proposed new structure, as well as those impacts from the recently constructed three-story neighboring building at 3501 Alemany.

Concerning engineering and construction impacts raised by DR applicants, the proposed project will be undertaken in full compliance with all City Codes. In addition to Planning review, project approval will require review by the Departments of Public Works, Building Inspection, Housing and Fire. Also, as mentioned above - during pre-construction timeline, the owner will make every effort to maintain the subject parcel in a safe manner and will assign a Project Representative to be be available as a neighborhood contact.

Finally, in response to apparent confusion regarding what plans are currently under review by the Department – we refer applicants to plan set included within the 311-notice dated 10/1/18; which is the subject of this DR application.
